

This term we went to Enginuity. Enginuity is a museum in Telford. It took thirty minutes to get there. When I got there I was excited.

We got off the mini-bus and went inside. Mrs Lyth got the tickets. A man came to the gate and took us for a talk about the museum and safety. Then we split up into our classes. Our class went to the red zone.

I made an arch with my class. Next I played same games. At half ten we had snack then we went into the blue zone and played in the water.

At half eleven we went back to school. My favourite zone was the blue zone because of the water. I had a brilliant time.

Art Exhibition

The children had the opportunity to visit our Sundorne centre to see the GCSE Art display. After looking round at the excellent art work the children had a drink and something to eat.

Forest School

The children have been having a great time at Forest School this term. They have learnt lots of new skills. They have spent time learning map reading, investigating the wildlife in the local habitat, building shelters and cooking over open fires.

On Wednesday 1st July it was our Sports Day. There were 4 different activities to take part in. There was an egg and spoon race, bean bag throwing, hurdles and javelin. The children were divided into 4 groups. They rotated around each event so that they all had the chance to try each activity.

For Your Diary
